

Your ref local Plan/
S+TNP/

Dear Mr Gibben

I am writing in response to the letter you send on 1.7.21 regarding Staunton and Thorntons Neighbourhood plan.

I am in favour of keeping our village's and then not being subsumed by buildings/dwellings that are not necessary.

As ~~well~~ we all know MBC have plans from 10 years ago that are now no longer viable due to the massive changes that are shaking our world. Covid being a factor and also this new "code red" emergency that will make some of this plan uninhabitable. MBC could make a difference here by:

- Limiting building, please don't build for buildings sake.
- Please think of your residents and listen to their genuine concerns.
- Limit the build to what is acceptable to your residents.
- Save our green spaces for future generations to come, as we know from Covid lockdown, residents need them now, more than ever. Covid is here to stay now and we will need these green places, to be able to manage in the outdoors.
- Money and the type of massive profits that builders make should not come before the health of the many.

Yours Sincerely
